

30p screw air compressor how much money

What is a 30 hp air compressor?

Equipped with a 30 HP (22 kW) engine, the device offers air flow ranging from 730 to 3300 l/min at a maximum pressure of 10 bar. Variable speed (IVR) technology allows for dynamic adjustment of operating parameters, making it an ideal choice for companies requiring a flexible and economical source of compressed air.

How many HP does a Quincy Rotary screw air compressor have?

The Quincy Compressor QGD series rotary screw air compressors come in 15 to 30 HP for small and medium-sized applications requiring a machine with a smaller footprint and 40 to 60 HP for medium-sized applications that demand a steady flow of compressed air.

What is a screw air compressor?

As these screw air compressors are generally not equipped with any valves and have no mechanical forces that cause unbalance, these solutions can be extremely efficient for various applications. This is because a screw compressor works at a higher shaft speed and compresses a large volume of air with small exterior dimensions.

How does ApS 30 IVR X compressor work?

1:1 direct drive- Direct power transmission eliminates energy loss, increasing efficiency and minimizing operating costs. The APS 30 IVR X compressor is equipped with a synchronous motor with permanent magnets, which ensures exceptional efficiency and durability.
