

# Air compressor as fixed assets

Are fixed assets long-term assets?

Fixed assets are considered long-term assets. This means they have a useful life of more than one year. Fixed assets include property, plant, and equipment (PPE) and may be recorded on the company's balance sheet under that classification. Fixed assets are generally tangible assets with a useful life of more than one year.

What are fixed assets?

Fixed assets are also called property, plant, and equipment. Fixed assets are the balance sheet items. They are reported at their book value at the end of the accounting period in different categories based on nature, their use, and the depreciation rate. Their value decreases based on the depreciation that the entity changes.

Can fixed assets be converted into cash?

Fixed assets are owned by an entity with a useful life of more than one year and cannot be converted into cash or cash equivalent within one year. This group of assets is not reported as expenses when the entity purchases them. Yet, they report purchasing and other related costs on the balance sheet.

How are fixed assets recorded on a balance sheet?

Fixed assets are recorded on a company's balance sheet, usually with the "property, plant, and equipment" classification. Fixed assets are depreciated over their useful lives to reflect wear and tear and to reduce the cost of the assets on the balance sheet. A company may also possess intangible fixed assets, such as patents or trademarks.

What factors are used to categorize fixed assets?

There are several factors that we use to categorize fixed assets. Those include the type or nature of assets and how those assets are used by the entity and sometimes based on the rate we charge fixed assets. For example, machinery and vehicles are categorized into two different categories.

What types of fixed assets are reported on a balance sheet?
