

Assembling the rock drill blindfolded

How difficult is it to drill into rock?

Drilling into rock isn't as difficult as it first appears. The material is bulky and can be difficult to work with, but you don't need to worry too much if you have the correct tools for the job. Find a hammer drill and a drill bit that is designed for difficult materials and you will get excellent finishes.

How do you drill a hole in a rock?

When you are around a 1/8 inch into the rock, you might want to give the drill bit some time to cool down. You can use a lubricant like water for the rock and the bit, but it's not necessary as rock is unlikely to split due to heat damage. When you have your initial hole, you can begin to drill through the rest of the material.

Do you know how to drill through rock?

However, not everyone knows how to drill through rock. As the rock is so hard, it can be easy to cause damage to a) the material itself and b) to your drill bits. This is obviously something we want to avoid. Wasting materials is wasting time, which leads to wasting money. You will need some specialist equipment to do this job right.

Do you need a hammer drill to work with a rock?

You will need a hammer drill to work with a rock. These impressive tools can come in one hand and two hand formats and are designed to use a "hammering action" to drill through the most difficult of materials.

Can a wood drill cut through a rock?

Secure the rock as best you can. Using scrap pieces of wood like chocks for an airplane is very possible, but give it a test push before you start drilling. Moving materials can cause serious injuries and poor finishes, so protect yourself and your profits with good preparation. Your drill cannot use a normal wood drill bit to cut through rock.

Do you need a lot of preparation to drill a rock?

As rock is a hard material, you don't need to do a lot of preparation with it. Poor technique can lead to cracks and chips, but that's mostly to do with your drilling technique. The most important thing to remember when dealing with rock is to take care that it won't drop onto you.

Road to the finish: Going over changes, and the build as I throw together this 2nd gen for the final run. Follow the build on Instagram @ CumminsCrawler
