What are the different types of rock drilling?

Types of Drills: The landscape of rock drilling is vast, with rotary, percussion, diamond, and masonry drills catering to different needs. Choosing the right type can greatly affect not just efficiency but also the quality of the drilling performed.

Does rock hardness affect drill bit selection?

Understanding the impact of rock hardness on drill bit selection is crucial for enhancing drilling speed and extending the lifespan of the drill bits, both of which are vital for the economic viability of drilling projects.

Do you need personal protective equipment for rock drilling?

Every drill operator knows that the best way to avoid injury is to be equipped with the proper gear. The right protective equipment acts as the first line of defense against hazards that are part of the rock drilling landscape. Wearing personal protective equipment (PPE) isn't simply recommended; it's essential. The critical items include:

Which drill bits are best for quartzite & corundum?

For extremely hard rock layers, such as quartzite and corundum, low-degree electroplated diamond drill bits are the preferred choice. These drill bits are specifically designed to enhance penetration rates while providing continuous high-efficiency cutting force with reduced wear, making them ideal for handling the most challenging rock types.

How do I choose a rock drill?

Here's a breakdown of the critical elements that should guide your decision-making when venturing into rock drilling. The nature of the rock dictates which kind of drill will perform best. Soft rock, like sandstone, may respond well to rotary drills, while hard rock, such as granite, demands robust percussion or diamond drills.

Which drill bits are best for hard rock?

For example, using alloy drill bits or small-tooth composite drill bits in soft rock layers can provide sufficient cutting power and prevent excessive wear, while electroplated diamond drill bits or hot-pressed diamond drill bits maintain efficient cutting speeds in hard rock materials.
