What is a permanent magnet compressor?

The Permanent Magnet Series sets the new standard in efficiency and power. With IE4 Super Premium Efficient motors, zero power loss drive systems, smart touchscreens, and whisper-quiet operation, these compressors are built to deliver more power, more control, and more uptime. 10-150 HP models available.

What is a magnet motor screw compressor?

Designed for industrial applications which require high performance and efficiency, magnet motor screw compressors are available with a wide range of outputs and configurations such as tank-mounted or base mounted and options with advanced control systems. Enhance efficiency with Ceccato's DRA 10 - 15 HP IVR PM.

What is an IPM screw compressor?

Discover our IPM screw compressors--leading-edge solutions with variable speed and permanent magnet engines,transforming energy efficiency. With over 70% of ownership costs related to energy consumption,our compressors redefine savings and performance across the entire IPM range.

What is Sav-M series Magnet variable speed drive screw air compressor?

SAV-M series magnet variable speed drive screw air compressor adopt high efficiency oil-cooled magnet frequency motor, intelligent frequency conversion control and screw airend , also upgrade optimization design of the system.

Why should you choose a variable speed compressor with permanent magnet motor?

Compressors at variable speed with permanent magnet motor push the energy savingto a new level. More than 70% of a compressor's costs of ownership are related to energy consumption. By choosing compressors with permanent magnet technology iPM,you can save up to 45% on energy costs compared to traditional fixed-speed compressors.

What is a single-stage air compressor?

With a working exhaust pressure of 0.8 MPa and an exhaust volume of 12.2 m<sup>3</sup>/min, this single-stage compressor delivers reliable and efficient compressed air for a variety of applications. Its air-cooled design ensures optimal performance even in demanding conditions, operating seamlessly in ambient temperatures of up to 46<sup>°</sup>C.

By integrating a high-efficiency permanent magnet motor with a direct-drive screw air end, this system eliminates belt transmission losses, ensuring stable and reliable ...
