

Construction Drilling Rig Purchase Contract

Do you pay the contractor to mobilize the drill rigs?

We pay the contractor to mobilize the drill rigs whether on land, or water (floating) or on water using a stationary platform (typically, a jackup barge). Unless there are extenuating circumstances, we pay the estimated quantity of drill rigs, provided the minimum percent working time requirements of the specifications are met.

What is included in a drilling contract?

Typical drilling contracts include a plan and a proposal. The Plan shows the proposed locations of the borings, the utilities in the area of the borings, and special notes that are appropriate to the plan. Frequently, each plan sheet includes a table of the borings for that sheet with their proposed location and estimated depth indicated.

How do drilling contracts work?

This information is generally provided through the Regional Geotechnical Section. However, there are occasions when additional assistance is necessary. At those times, drilling contracts are let to procure the services of companies experienced in obtaining subsurface information, soil and rock samples, for geotechnical engineering purposes.

How are drill rig samples Paid?

Driven split barrel samples and thin-walled tube samples are paid on an each basis. Rock core of various sizes is paid by the linear foot (meter). We pay the contractor to mobilize the drill rigs whether on land, or water (floating) or on water using a stationary platform (typically, a jackup barge).

What are the requirements for a drilling contract?

GENERAL REQUIREMENTS Typical drilling contracts include a plan and a proposal. The Plan shows the proposed locations of the borings, the utilities in the area of the borings, and special notes that are appropriate to the plan.
