

Core Drill Rig Accessories Video

How does a core drilling rig work?

Depending on the size of the hole, most situations require the drilling rig to be attached to the ground or surface with an anchor, bolt, or vacuum seal to keep the rig stabilized. Because core drilling requires substantial speed and force to get through concrete, a lot of heat is generated during the drilling process.

What types of drilling rigs are available?

The drilling videos featured here on our website showcase the capabilities of various types of drilling rigs, including water well drilling, auger drilling, core drilling, and more.

What is a diamond core drill rig?

A diamond core drill rig is a large mechanical device used for drilling into solid earth, rock, or concrete. It uses a cylindrical shaft and rotating drill bit to create a 'core' that can be extracted and examined.
