Does a percussion rock drill cut through rock?

First - it is important to understand that a percussion rock drill does not cut through rock. Each blow shatters the rock in front of the bit - the steel and bit then rotates slightly and it shatters new rock while air is blown down the center of the drill steel clearing the bit face and blowing the chips up and out of the hole.

DECKWELL's rock drills, available in pneumatic, hydraulic, etc., are essential for mining and tunneling. They offer high drilling speed, efficiency, and are designed to handle various rock ...
