

Down-the-hole drill blasthole

What is a down-the-hole drill?

A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the bottom of a drill string. The fast hammer action breaks hard rock into small cuttings and dust that are evacuated by a fluid (air, water or drilling mud). The DTH hammer is one of the fastest ways to drill hard rock.

Why should you buy a blasthole drill?

Built tough, our top-hammer, Down the Hole (DTH) and pneumatic drills are equipped with features that maximize efficiency to assure high-performance at a low operating cost. Operators appreciate the high performance and reliability of our blasthole drills, packed with features that make operation easy and reduce the worries of downtime.

What is a blasthole rig & Drill?

Blasthole rigs and drills don't need much explanation. They're used for drilling a hole into the surface of the rock, packing the hole with explosives and then detonating those explosives in the blasthole to break up rock and hard minerals to make it easier to remove.

Which rig is best for blasthole drilling?

Heavy duty Rotary and Down-The-Hole rigs for Blasthole drilling Open Pit Blast Pattern Rules of thumb 0.7 to 1.3 burden. MINE TYPES Drill Types and Technology Drill Types Hammer Technology Top Hammer Blasthole Drilling Down the Hole Drilling Rotary Drilling Rotary drilling is a versatile method for blasthole drilling.

How do you drill a hole in a rock?

In smaller holes, it is most common in softer rock formations. The drilling principle is to use a high pull down force (weight-on-bit), rotate the drill bit, and blow the rock cuttings to the surface with compressed air. Hardrock drills typically use the Rotary method to drill blastholes from 200 mm (7 7/8") to 311 mm (12 1/8") diameter.

What type of bit is used for rotary blasthole drilling?

Roller-cone or tricone bits are the most common bit used for rotary blasthole drilling. Bits have three or more cones ("rollers" or "cutters")--made with hardened steel teeth or tungsten carbide inserts of varied shape, length, and spacing--on spindles and bearings set at an angle to the axis of the bit.

The ZT44 is a down-the-hole surface drill rig designed for mining-duty applications. It offers high reliability and production with purpose-built ...

INTRODUCTION In this chapter, the term "down-the-hole drill" (DTH drill) is used as a generic name that encompasses the various trade names and other references such as "downhole ...

Down-the-hole drill blasthole

CENTER ROCK products boast a formidable range of down-the-hole (DTH) hammers, presenting a suite of drills and downhole bits spanning 3.5"- 48" (89 -1219mm). Our DTH hammer drilling ...

Down-the-hole drilling (DTH) essentially involves a drilling hammer at the bottom of a drill string. It relies on three elements for drilling holes: bit loading ...

Blast Hole Drilling Three-D Drilling is your leading provider of blast hole services. With our fleet of over 10 blast hole drills, our trained operators work to take ...

Mineral/Ore Mined using the Hardrock Blast hole Drill, which are Heavy duty Rotary and or Down-The-Hole rigs for Blast hole drilling. It can ...

Dependable Blasthole Drills Start at Step One Blasthole rigs and drills don't need much explanation. They're used for drilling a hole into the surface of the rock, ...

Overview Precision Performance to Drive Costs Down and Profitability Up The Cat® MD6310 is a powerful, flexible rotary blasthole drill that offers a wide ...

HISTORICAL PERSPECTIVE ON PRODUCTION DRILLING METHODS Air-flushed drilling with top hammers began in the mining industry in Sweden in 1873, while down-the-hole (DTH) ...

Selection of DTH Drilling Tools Rotary Drilling Method General Drilling Method and Application DTH Drilling Care & Maintenance - Part One ...

Leopard(TM) DI550 diesel-powered, down-the-hole (DTH) drill has enhanced mobility, a smaller footprint and can serve multiple sites. Designed for DTH ...

Built tough, our top-hammer, Down the Hole (DTH) and pneumatic drills are equipped with features that maximize efficiency to assure high-performance at ...

DTH (Down the Hole) drilling is a crucial process in blast hole drilling operations, known for its efficiency and reliability. Understanding the DTH drilling process is essential for maximizing ...

DTH hammer is used for drilling holes through a wide range of rock types, the variety of which continues to extend well beyond the original conception of early blast hole drilling. Down-the ...

DTH drilling, also known as Down-the-Hole drilling, is a method used to drill boreholes into the earth's surface. This technique involves a hammer that is located behind the drill bit and is ...

The optimum range of hole size for blast hole drilling with DTH is 90 mm to 254 mm (3 ½"-10?).

Down-the-hole drill blasthole

Smaller blast holes are generally drilled using topammer, ...

Good drilling practices include carefully monitoring drill-rig operating parameters, taking careful notes of the changes in geology during drilling, and effectively communicating to the blasting ...

Down-the-hole drill DTH drill tool operated with drilling mud (Drillstar MUDHammer) A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the ...

Epiroc offers the most comprehensive line of rotary blast hole drilling rigs in the industry. With a multitude of configurations to choose from you can find the ...

Our Down the Hole Drill Hole & Rotary Blast Hole Rig suit your requirement going from 3 Inch Top Hammer to 6 ½ Inch DTH Drills.

Rotary / DTH blast hole drill is a diesel-powered, self-propelled, crawler-mounted blasthole drill for surface mining. It is equipped for rotary with optional down-the- hole drilling power.

DTH drilling, also known as Down-the-Hole drilling, is a method used to drill boreholes into the earth's surface. This technique involves a hammer that is ...

HAMMER DEVELOPMENT The Down-the-hole or DTH hammer is used for drilling holes through a wide range of rocks and associated materials and the variety of applications to which it can ...

Sandvik D45KS drills holes down to a maximum depth of 63 meters (206.69 ft) and is designed for coal, gold and iron ore mining. It prioritizes easy ...

The newest addition to our Rockmaster series is the RM615A, a brand new second generation blast hole drilling rig. Our Rockmaster series, which is ...

Down-the-hole (DTH) drilling is a method used to drill boreholes in hard rock formations for various applications such as mining, construction, and quarrying. This technique involves a ...

The ZT44 is a down-the-hole surface drill rig designed for mining-duty applications. It offers high reliability and production with purpose-built structures, a high horsepower engine and large ...

Leopard(TM) DI650i is an intelligent diesel-powered, self-contained, crawler-mounted down-the-hole drill rig built for demanding high-capacity production drilling applications in surface mining and ...

High-impact DTH blast hole drills engineered for mining, quarrying, and construction blasting. CINTRL rigs feature low air consumption hammers, depth accuracy (±0.5°), and rugged ...

Down-the-hole drill blasthole

The optimum range of hole size for blast hole drilling with DTH is 90 mm to 254 mm (3 1/2"-10"). Smaller blast holes are generally drilled using topammer, and larger holes generally use ...
