What is a down the hole hammer?

Bits are conditioned by a special manufacturing procedure which establishes a protective cushion on the bits, thus reducing chances of cracking which often occur in hi-impact drilling products. The Down the Hole hammers range varies from 2.5 to 12 inches diameter. The Down the Hole over burden drilling systems ranges from 4 3/4-12 inches diameter.

What is a down the hole over burden drilling system?

How big is a down the hole hammer?

The Down the Hole hammers range varies from 2.5 to 12 inches diameter. The Down the Hole over burden drilling systems ranges from 4 3/4-12 inches diameter. DTH Products are field tested to stringent quality requirements to provide consistent performance results in the field.

Can a DTH hammer drill a hole?

In other applications, like foundation drilling, DTH hammers can be used with single bit in hole sizes up to . 750 mm (30?). With multiple hammer units CD (Cluster drills) drill holes up to 70? or 1778 mm. As a rule of thumb, the smallest hole diameter a DTH hammer can drill is its nominal size. A 4 inch hammer will drill a 4 inch (102 mm) hole.

What accessories are available for a DTH hammer?
