

Down-the-hole drill operating platform

What is downhole drilling?

Downhole drilling is a sophisticated field where operators leverage cutting-edge tools and methodologies to access critical resources as global energy demand continues rising. The industry's ongoing progress with innovative drilling technology will be crucial to meet the world's hydrocarbon needs now and into the future.

What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.

How does DTH drilling work?

With DTH drilling, contractors can change the drill that they were using for the current directional bore to a rock drill when they encounter rock by connecting the drill with a compressor and a steerable hammer. Well drilling also needed changes to be made to rotary drilling when the well needed to take a turn.

What is the difference between rotary drilling and DTH drilling?

The lower rotational speed reduces vibrations to the drill head and rig. In relation to pure rotary drilling, DTH drilling is faster, due to the more focused and intensified stresses imposed on the rock, and does not require sophisticated drilling mud preparation, handling and cleaning systems.

How to drill a hole with a drill bit?

Specific operation method: whenever drilling begins, the operator must swing the drilling tools gradually to the bottom of the hole. When the frequency down the hole reaches 700~900 times/min and the pressure of the drilling tool on the drill bit reaches about 3kN, it can be the best impact speed.

What is a DTH drill rig?

A down-the-hole drill, usually called DTH Drilling Rig, is basically a mini jackhammer screwed on the bottom of a drill string. The speedy hammer activity breaks hard stone into little flakes and dust and can be dismissed evident by the air exhaust in the DTH hammer.

The most productive drill available for rotary tricone and down the hole drilling of 171mm to 270mm (6-3/4" to 10-5/8 ") holes with up to 59 ft (18 m) clean hole single pass capability.

Discover the impact of Down the Hole Hammers (DTH hammers) in urban redevelopment projects. Learn how these specialized tools enable ...

Multifunctional Drilling Rig - High Power, High Efficiency, Maximum Versatility Multifunctional Drilling Rig is a high-performance, multi-purpose machine designed to meet demanding drilling ...

Down-the-hole drill operating platform

Leopard(TM) DI550 diesel-powered, down-the-hole (DTH) drill has enhanced mobility, a smaller footprint and can serve multiple sites. Designed for DTH blasthole drilling in mining, quarry and ...

Sandvik Mining and Rock Solutions says it is evolving its Leopard(TM) DI650i down-the-hole (DTH) drill rig to support fully autonomous operation. The new iDrill automation ...

TECHNICAL SPECIFICATION Sandvik DR412i is a diesel-powered, self-propelled, crawler-mounted blasthole drill for surface mining. It is standard equipped for rotary with optional down ...

In down-the-hole drilling a drill rod is fitted with a hammer at its lower end. The hammer, which is mounted on the drill bit, is activated through the addition of ...

Discover the advanced capabilities of down the hole drill technology, offering superior penetration rates, efficient debris removal, and versatile application range for optimal drilling performance ...

Sandvik Mining and Rock Solutions says it is evolving its Leopard(TM) DI650i down-the-hole (DTH) drill rig to support fully autonomous ...

Intelligent, automated and future-proof The SmartROC D65 down-the-hole drill rig brings the future of mining within your reach today. Give your operation the chance to profit from the ...

KT7D integrated open-pit drilling machine is a drilling equipment that integrates the drilling system and the screw air compression system. It can drill vertical, inclined and horizontal holes for ...

Down-the-hole (DTH) hammer drilling is a method of rock drilling that uses a pneumatic hammer to pulverize the rock at the bottom of the hole. This ...

Sandvik DR411i blast hole drill. This powerhouse offers a compact design with maximum power for rotary and down-the-hole hammer drilling. Key Features: High Precision: Achieve precise and clean blast holes with our traveling centralizer on an extended mast. Advanced Technology: ...

Multifunctional Drilling Rig - High Power, High Efficiency, Maximum Versatility Multifunctional Drilling Rig is a high-performance, multi-purpose machine ...

5. Drill boom luffing of large-scale systems can meet various needs of different stations working conditions, in particular drill low level holes. 6. The highly integrated hydraulic control systems ...

Leopard(TM) DI560 is a highly mobile, compact, diesel-powered down-the-hole (DTH) drill designed for DTH blasthole drilling in mining, quarry and ...

surface down to the inside of the drilled pipe the mud passes. Through the Jets in the drill bit and travels back

Down-the-hole drill operating platform

to the sea floor to the space between the drill bit and the walls of the hole drilling ...

These drills have solid engine and compressor options that provide the right combination for each drilling condition. The engine and compressor range allows for optimized hole flushing and ...

The Sandvik DR410i is a diesel-powered, self-propelled crawler drill that can drill blast holes between 152-251mm in diameter. It has standard rotary drilling ...

5. Drill boom luffing of large-scale systems can meet various needs of different stations working conditions, in particular drill low level holes. 6. The highly ...

An Inside Look at Downhole Drilling Technology - Industry Tap Modern rotary rigs use high-torque top drives to turn the drill string and advanced mud circulation systems to ...

<p>Air down-the-hole(DTH) hammer drilling has long been recognized to have the potential of drilling faster than conventional rotary drill, especially in some hard rocks such as ...

Discover how the right down-the-hole (DTH) drill rig can boost your mining and construction efficiency. Learn about rig types, key features, and ...

Unlock the power and precision of Down-the-Hole (DTH) drilling! This ultimate guide dives deep into the mechanics, applications, advantages, ...

EM ANTENNA Drill with a Flash, our multi-purpose MWD tool designed to be whatever tool you need it to be, whenever you need it. Flash is all about options; add-on transmitters, add-on ...

TECHNICAL SPECIFICATION Sandvik DR410i is a diesel-powered, self-propelled, crawler-mounted blasthole drill for surface mining. It is standard equipped for rotary with optional down ...

Key Takeaways DTH hammer drills operate by delivering powerful blows to the drill bit using compressed air, enabling efficient drilling through hard rock surfaces. The down ...

REVERSE CIRCULATION DRILLING "Reverse Circulation" drilling involves the supply of air down through the drill-string to decrease the "effective density" of the water in the center of the drill ...

Sandvik DR411i blast hole drill. This powerhouse offers a compact design with maximum power for rotary and down-the-hole hammer drilling. Key Features: High Precision: Achieve precise ...

5.1.1a: Drills, Explosives Loaders, and Rippers Drills Drills are used to create a hole of a certain diameter and depth. Occasionally, the goal of drilling is to ...
