What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.

What is a down-the-hole drill?

A down-the-hole drill, usually called DTH, is basically a mini jackhammer screwed on the bottom of a drill string.

What is a DTH drill rig?

A down-the-hole drill, usually called DTH Drilling Rig, is basically a mini jackhammer screwed on the bottom of a drill string. The speedy hammer activity breaks hard stone into little flakes and dust and can be dismissed evident by the air exhaust in the DTH hammer.

How does a DTH drill work?

DTH equipment consists of a drilling hammer and a piston-powered by compressed air. As the drill string rotates, the drilling hammer strikes down on the rock. The drill bit receives its striking power from a piston inside the hammer that is powered by compressed air.

Can a hammer be used to drill a hole?

When drilling holes in water-bearing rock, never leave the hammer at the hole bottom with the air supply switched off. If drilling is to be suspended temporarily, always pull up the hammer by at least two pipe lengths. Clean around the driver chuck before changing the drill bit. Make sure the shank of the new drill bit is clean.

How much water do you add to a drill hole?

A rule of thumb is to add 0,25 litres of water per m<sup>3</sup> compressed air. The occurrence of water in the drill hole is common. Both "too little" and "too much" can be troublesome. Too little water tends to bind the drill cuttings into a paste, which sticks to the drill pipes or the hole wall and can easily form plugs.

Down-the-hole (DTH) hammer drilling is often used to drill large, deep holes in hard rock formations or concrete. It is, as the name tries to explain, a hammer ...

Download scientific diagram | Drilling mechanisms of two types of percussive drilling system: (a) top-hammer drilling and (b) down-the-hole drilling (modified from Song et al. [1]). from ...

Leopard(TM) DI550 diesel-powered, down-the-hole (DTH) drill has enhanced mobility, a smaller footprint and can serve multiple sites. Designed for DTH ...

Down-the-hole (DTH) hammer drilling is often used to drill large, deep holes in hard rock formations or concrete. It is, as the name tries to explain, a hammer drill which is positioned ...

Drilling is a process whereby a hole is bored using a drill bit to create a well for oil and natural gas production. The term drilling also indicates the whole complexity of operations necessary to ...

Surface drill rigs are used for blast hole drilling in construction, quarrying, and open-pit mining, covering a hole range between 27-229 mm. We offer the ...

The Secoroc COP M6 down-the-hole hammer and drill bit operate at the bottom of the hole as a unit. A driver chuck (2) threads into the front end of the casing (7). The splined union between ...

Drilling Methods The components of a drill rig are (1) the rig itself, which supplies the power to mobilize, drill rock, and remove the drill cuttings from the hole; (2) the mounting; (3) the drill ...
