

Earplugs for rock drills

What are the best earplugs?

More than 40 years ago this simple hearing protector, the world's first foam ear plug, revolutionized hearing protection in the workplace and has remained to this day one of the most widely used earplugs in the world. The 3M E-A-R Classic Earplugs are constructed from slow-recovery, low-pressure foam.

How do you use an ear plug?

Reach around your head with opposite hand to pull ear outward and upward, then insert compressed ear plug well into ear canal. Check fit after ear plug expands in ear. Touch ear plug. You should feel only the end of ear plug. Listen to steady loud noise with ear plugs in both ears. Cover ears with tightly cupped hands.

What are 3M E-A-R Classic earplugs?

The 3M E-A-R Classic Earplugs are constructed from slow-recovery, low-pressure foam. They fit snugly to create a noise barrier that helps protect hearing from loud sounds. These ear plugs are stiff enough when compressed to make fitting easy, yet soft enough to be comfortable in the ear for extended wear.

What are the best ear protection devices for construction workers?

The best ear protection devices for construction workers are earmuffs and custom-fitted earplugs. Look for earmuffs with a high Noise Reduction Rating (NRR) of 25dB or more to effectively block loud construction noises.

How do earplugs work?

The earplugs come in a bright green color, which makes them easy to spot and use. The earplugs are made from soft foam, which is comfortable to wear for an extended period. The foam expands slowly after being inserted into your ear, giving you a gentle, snug fit that molds to your ear canal's shape.

How do I know if my ear plugs are good?

Listen to steady loud noise with ear plugs in both ears. Cover ears with tightly cupped hands. Noise should sound about the same whether or not ears are covered. If you feel most of ear plug outside the ear canal, remove ear plug and repeat fitting. If you cannot obtain a good fit, try a different size or type of hearing protector.
