

Electric Air Compressor Instructions

How do I connect my air compressor?

To be able to use your compressor, you'll then need to connect your air hose. Your compressor will have at least one hose connector or "coupler" for this purpose. This coupler is a small metal cylinder with a hole in the end. One end of your air hose will have a "male" plug that fits into this hole.

How to charge air compressor?

2. Fully charge the air compressor, then turn it on. The inflation speed 1. Check whether the battery power is sufficient.

How do you connect a compressor to a hose?

Once your air hose is hooked up to the compressor, go ahead and attach your desired air tool to the other end of the hose, which will likely have a female quick-connect coupler. As before, simply push the tool's plug into the coupler until it clicks, then pull on the tool to make sure it's seated properly.

How should an air compressor be used?

Before using an air compressor, ensure the area is well ventilated and free of flammable vapors, combustible dust, gases or other combustible materials. Do not smoke when spraying flammable material. Locate the air compressor at least 20 feet away from the spray area (An additional hose may be required). Never place objects against or on top of the air compressor.

How do you clean an air compressor?

ng on the safety relief valve ring. Once pressure in the air tanks register under 10 PSI, open the drain valve under each air tank to drain any moisture. Allow the air compressor to cool down. Wipe air compressor clean an

How do I maintain my air compressor?

To maintain your portable electric air compressor, ensure the oil level in the air compressor pump is adequate. If low, add SAE-30W non-detergent oil. Do not incline the air compressor more than 10°; to avoid damaging it. Place the air compressor at least 12 inches away from obstacles for proper ventilation.
