

Electrical Engineer for Electric Drilling Rigs

Can an electrician work on a drilling rig?

As an electrician you have a good basis for a career within offshore electrical engineering. The minimum for everyone who will work offshore on a drilling rig is that they must have an approved health certificate, as well as safety course.

What does an oil rig electrician do?

As an oil rig electrician, you can be expected to perform maintenance on a drill or pump. These are typically located on a floating rig or an artificial island. Some facilities are even attached directly to the ocean floor. An oil rig electrician is expected to have knowledge of power generation, motor controls, safety devices, and instrumentation.

How do I become an oil rig electrician?

Pay special attention to automated and cooling systems when in electrical school, and try to tailor your studies as much as possible (either through independent reading or specific courses) toward the oil rig industry. In addition to knowing the wiring and functions of your workplace, it will be beneficial to display good leadership qualities.

What makes a good oil rig electrician?

You'll need to be able to both give direction, and follow direction, from your team and superiors. A successful oil rig electrician will need to be able to work alone, and with a group, to maximize productivity. While the future of energy may shift away from oil, it's unlikely that oil will lose its value any time soon.

Is an oil rig a good job?

If you appreciate the technical side of power and energy, but want a more unconventional career in the electrical industry, an oil rig, or offshore electrician job, could be perfect for you. While the future of energy may shift away from oil, it's unlikely that oil will lose its value any time soon.

What qualifications do you need to work on a drilling rig?

The minimum for everyone who will work offshore on a drilling rig is that they must have an approved health certificate, as well as safety course. Most offshore positions also require that you have good knowledge of English and applicants with a trade certificate and relevant experience will most often be preferred.
