How many oil drilling rig operation videos are there?

Browse 372 oil drilling rig operation videos and clips available to use in your projects, or start a new search to explore more footage and b-roll video clips. Drone shot of oil pump jacks in Oil city, Kern County, California. This intensive drilling operation is part of the Oil Field in Bakersfield, California, USA.

What is rigging up a rig?

Rigging up the well consists of taking the rig modules from the trucks and assembling the rig. Included in the rigging up process is setting-up all of the rig systems and testing these systems. Here is a YouTube video, "Rigging up Land Drilling Rig" (3:35), showing the Rigging Up process of the derrick:

What are the different types of drilling rigs offered by Simco?

With a focus on the specific processes involved in geothermal drilling, geotechnical drilling, and water well drilling, these drilling videos enable you to see the differences between the various drilling rigs offered by SIMCO. A variety of geothermal drilling videos allow you to view Air Rotary DTH Hammer and Mud Rotary drilling.

What rig is used in the video?

The rig used in the video is one of the most advanced land rigs in the industry with top drive, Iron Roughneck™, and automated catwalk. The drilling portion of the video is followed by well completion. The video shows both the surface and animated-downhole process for multi-stage hydraulic fracturing.

What types of drilling rigs are available?

The drilling videos featured here on our website showcase the capabilities of various types of drilling rigs, including water well drilling, auger drilling, core drilling, and more.

What can I learn about drilling in 2 hours?

There is nowhere else that you can learn more about drilling in 2 hours! It is a must-see for anyone working in or with the oil and gas industry. (see the trailer and video segments below) The video begins with a brief discussion of wellsite selection and planning, followed by site preparation and rig mobilization.

In the field of mining and engineering surveying, the 600m core drill rig is an indispensable professional equipment. This static display video will take you to observe the ...

Drilling operation is a cutting process where a drill bit is spun to cut a hole of circular cross-section in solid, used to create wells.

This video explains the basics of how offshore deep water wells are drilled, including explanations and
