What is air compressor maintenance?

Air compressor maintenance is the routine servicing of industrial air compressors. Using a digital checklist, engineers and safety officers conduct air compressor preventive maintenance on a daily, weekly, monthly, and yearly basis to ensure the optimal operation of air compressors. Why Conduct Air Compressor Maintenance?

What is an air compressor maintenance checklist?

An air compressor maintenance checklist is used for the routine preventive inspection of air compressors. It helps engineers and safety officers and technicians to conduct daily, weekly, monthly, or yearly compressor preventive maintenance to ensure the efficient operation of air compressors. The audit checklist contains:

What is the final temperature of a air compressor?

Some compressors are equipped with combination filter-silencer units that have the filter elements contained within the silencer housing. When air is compressed to 100 psi without heat loss, the final temperature is about 485°F.

How often should air compressors be serviced?

Ensure all of your operators know how to operate the equipment. In all cases, you should use the manufacturer's manual when making repairs or adjustments. All auxiliary equipment that services the air compressor or is serviced by the compressor requires periodic scheduled maintenance. Air filters should be checked and cleaned at least once a month.

What are the air pressure requirements for low-pressure air consumers?

Several air pressure requirements for low-pressure air consumers are listed below: Medium-pressure systems provide compressed air within the range of 126 to 399 psig pressure. These systems are not extensive and are generally provided with individual compressors located near the loads.

What are the quality requirements for commercial compressed air applications?

The full extent of the quality requirements for commercial compressed air applications can be located in the Compressed Air Association publication Commodity Specification for Air, G-7.1 (ANSI 286.1-1973). Breathing air must be of high quality for obvious reasons.
