

Find a driller to get the core

What types of drilling services does A-Core offer?

A-Core offers concrete core drilling, deep core drilling, tenant improvements, seismic renovations, and angled drilling. With a little math and some ingenuity, we have the ability to drill compound or complex angles at any depth or diameter.

What is A-Core drilling?

A-Core drilling is one of the many services offered by A-Core. With the country's largest supply of diamond core drill bits, A-Core is qualified and properly equipped to handle concrete drilling projects of any size. They can drill concrete holes as small as 3/4" up to 73" in diameter and any depth.

How deep can a core drill go?

A-Core's core drilling services can drill to any depth. While a standard core drill bit has a max drill depth of about 14", deep drilling requires core drill tubing, which can extend the drilling depth significantly. A-Core can drill concrete holes as small as 3/4" up to 73" in diameter using this method.

Can core drilling be done at any angle?

Some Projects require holes to be drilled at almost any angle. Core Drilling may not always be straight through a wall or vertically through a slab. Wire Saws, Deep Core Drilling, and wall saws are some of the tools we have to get an older structure up to code and safe.

Can a core drill be used to drill concrete holes?

A-Core is qualified and properly equipped to handle concrete drilling projects of any size using diamond core drill bits. A-Core can drill concrete holes as small as 3/4" up to 73" in diameter and any depth using the deep drilling process.
