

Finland permanent magnet variable frequency screw air compressor agent

What is bmvf series permanent magnet variable frequency screw compressor?

In contrast, BMVF series permanent magnet variable frequency screw compressors maintain high motor efficiency at any speed, offering superior energy savings compared to traditional screw compressors with external frequency converters. Moreover, the adjustment range for standard compressors with external converters is 40-100%.

What is Sav-M series Magnet variable speed drive screw air compressor?

SAV-M series magnet variable speed drive screw air compressor adopt high efficiency oil-cooled magnet frequency motor, intelligent frequency conversion control and screw airend , also upgrade optimization design of the system.

What is a variable speed motor in air compressor?

Variable speed motors in air compressors, because of the high efficiency at wide speed range, brushless DC motors are widely used at variable speed conditions. This motor is used in an air compressor system, compared to an asynchronous induction motor system.

What is the adjustment range for bmvf screw compressors?

Moreover, the adjustment range for standard compressors with external converters is 40-100%. Thus, if conditions deviate over 60%, speed adjustment becomes impossible. The BMVF series screw compressors, however, have an adjustment range of 15-100%, allowing them to function effectively even with an 85% deviation from working conditions.
