

Hanyang District Stationary Air Compressor Operation

What are the maintenance and service procedures for the stationary air compressor?

Maintenance and service procedures for the Stationary Air Compressor breathing air system must be performed by a SCOTT trained and certified service technician. The operator is responsible for monitoring the compressor run time and notifying the System Administrator when the intervals of fifty (50) and one hundred (100) hours occur.

How do I contact Scott Safety about the stationary air compressor system?

For additional information regarding the design, operation, or service of the Stationary Air Compressor System, contact SCOTT Safety at 1-800-247-7257. The standard Stationary Air Compressor System is equipped with a heavy-duty, three- or four-stage, air-cooled compressor.

What happens if a stationary air compressor is not set up?

Use of this equipment without proper set up may result in serious personal injury, death, or permanent equipment damage. For additional information regarding the design, operation, or service of the Stationary Air Compressor System, contact SCOTT Safety at 1-800-247-7257.

What is a stationary air compressor system?

The standard Stationary Air Compressor System is equipped with a heavy-duty, three- or four-stage, air-cooled compressor. The system also includes an automatic condensate drain system, compressor stage gauge panel, and a low oil shut-off switch.

How often should a stationary air compressor be operated?

SCOTT recommends that the compressor system should be operated for at least thirty (30) minutes once a week to maintain optimum performance and to identify any problems. Maintenance and service procedures for the Stationary Air Compressor breathing air system must be performed by a SCOTT trained and certified service technician.

What if all compressor operating parameters are in tolerance?

If all Compressor Operating Parameters are in tolerance, the system is ready to fill breathing air cylinders. Proceed to the instructions for charging breathing air cylinders provided with your cylinder charging station (SCOTT RevolveAir or Guardian). NEVER attempt to perform service while the compressor system is in use in the AUTO mode.
