How much does it cost to drill a borewell in India?

In India, the cost of drilling a borewell typically ranges from INR30,000 to INR1,50,000 or more, depending on the factors mentioned above. For example: Shallow Borewells (up to 100 feet): Costs may range from INR30,000 to INR50,000. Medium Depth Borewells (100 to 300 feet): Costs may range from INR50,000 to INR1,00,000.

What determines the cost of drilling a borewell?

The depth of the borewell plays a crucial role in determining the cost. The deeper the borewell, the more expensive it will be. Depth is influenced by the water table level, which can vary greatly across different regions. In areas where the water table is low, drilling deeper will be necessary, thereby increasing the cost.

Which drilling method is best for a borewell?

Type of Drilling Method Used Manual Drilling: Suitable for shallow borewells with lower costs. Rotary Drilling: Used for medium-depth borewells, with moderate pricing. DTH (Down-The-Hole) Drilling: Recommended for deep borewells and hard rock terrains, making it the costliest option.

What is a down the hole hammer?

Down-the-Hole refers to where the hammer action occurs when compared to drifter hammers, which hammer on top of the drill string. The DTH hammer piston always makes direct contact with the drill bit and there is generally no loss of transmitted energy as the hammer drills deeper, as is the case with drifter (top hammer) rigs.
