

How to deal with the slow inflation of Jingbao screw air compressor

Do screw type compressors have problems?

Consistent with regular maintenance, screw type compressors can experience issues. Here are some common problems and their probable solutions: Causes: Low air pressure can result from a blocked air filter, air leaks in the system, or issues with the compressor's inlet valve. Solutions: Start by checking the air filter and replacing it if necessary.

What happens if a screw air compressor malfunctions?

Therefore, any malfunction in a screw air compressor not only disrupts production rhythms but may also lead to safety issues and economic losses. Thus, an in-depth study of common faults and their solutions is crucial for ensuring the stability and efficiency of industrial production.

How does a screw compressor work?

A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand. The inlet valve is controlled by a solenoid valve that supplies control air to the inlet/loading valve. Check solenoid valve coil and solenoid valve operation.

How to maintain a screw type compressor?

Check the compressor's settings and adjust them for optimal efficiency. To maximise the lifespan of your screw type compressor, consider the following best practices: Use Genuine Parts: Always use genuine parts recommended by the screw compressor manufacturers. This ensures compatibility and maintains the goodness of the compressor.

Why is maintenance important for screw type compressors?

Routine maintenance of screw type compressors is important to avoid costly breakdowns and ensure the machine works at prime efficiency. Ignoring maintenance can lead to a decrease in performance, higher energy consumption, and potential damage to the compressor components.

How do I fix a screw air compressor?

For more information, MINNUO welcomes your inquiries! Screw air compressors' faults, like startup issues and vibrations, can be fixed with slide valve adjustments and proper lubrication.
