How do I tighten the air bag fitting?

It was the air line that goes on the air bag. Raise the seat and drop the rubber cover you can feel the line and just push back into the fitting. The fitting is just a push pull connector. You don't need tighten anything. Maybe just a bad fitting. I have not taken my back to the dealer yet.

How much does an air compressor assembly cost?

I was informed that I probably needed the air compressor assembly which is now around \$700. The neighbor had bought his 8210 on auction and had the same problem. He discovered that the Sears folks (maker of the seat) used some type of sealant on an access plug that dries out with time causing a leak at that point.

How do you fix air leak on a tractor?

The fix is simple enough,remove the plug,apply some tape or pipe dope and put it back in. This was the situation on both of our tractors. So this took care of the air problem with no parts - Great! In looking around the seat area I found a roller and later the pin that the roller rides on.

How do you clean a seat apron?

I sprayed everything under the seat liberally with soapy water while the seat was fully inflated and never saw any soap bubbles. We pulled the seat apron down and propped the seat up with a BFH and slid the air lines on and plugged in the harness.
