

How to disassemble the water well drilling rig head

What rig do you use to drill a water well?

My Father and Grandfather used to drill water wells with a "Baptist" type rig. It was slow compared to a rotary but very simple and cheap to make. They could probably go down to four hundred feet or so. It doesn't require large horse power or a water pump to circulate.

How do you drill a hole in a drill rig?

The method I would recommend is the cable tool method. You could buy used tools reasonably priced. All the rig has to do is spool cable (5/8") or so to allow the bit to go up and down. A walking beam is needed to drill with. This is what gives the up/down movement that does the chewing up of the material your going through.
