How do you use a compressor coupler?

As before, simply push the tool's plug into the coupler until it clicks, then pull on the tool to make sure it's seated properly. Whatever tool you use, make sure it's the appropriate size for your compressor's CFM (cubic feet per minute) output.

How do I connect my air compressor?

To be able to use your compressor, you'll then need to connect your air hose. Your compressor will have at least one hose connector or "coupler" for this purpose. This coupler is a small metal cylinder with a hole in the end. One end of your air hose will have a "male" plug that fits into this hole.

How do you fix a clogged air compressor?

Make sure all rags, tools, oil, etc. are away from the unit. Open the air system to free it of any pressure. Switch the compressor on for a few revolutions to make sure the rotation is correct. Correct rotation is clockwise when facing the sight glass on the pump.

What should I do if my compressor pressure is too high?

Make sure the pressure in the tank does not exceed its rating: Single Stage units at 135 psi, Two Stage units at 175 psi. If the pressure gauge indicates a pressure that is higher than these maximum pressures, shut off compressor immediately and call your distributor. PLEASE REFER TO YOUR ENGINE OPERATION MANUAL FOR PROPER STARTING INSTRUCTIONS.
