

Iron ore dedicated down-the-hole drill rig

What is a DTH rig machine?

DTH rig machine, down-the-hole drilling rig, is a powerhouse drilling tool designed for deep, accurate, and efficient boring in demanding environments. Ideal for mining exploration, quarry operations, water well drilling, and construction projects, DTH rigs deliver unmatched performance in hard rock formations.

How deep can a Sandvik d45ks drill a hole?

Sandvik D45KS drills holes down to a maximum depth of 63 meters (206.69 ft) and is designed for coal, gold and iron ore mining. It prioritizes easy maintenance and repairs for applications where reliability is a necessity. Sandvik D45KS comes with a high pressure air compressor for down-the-hole (DTH) drilling in gold mining or quarrying.

What is a Sandvik dr416i drill rig?

Sandvik DR416i blasthole drill rig delivers a single-pass capacity of 21 meters (69 ft), the longest in its class along with a maximum depth of 42.4 meters (139ft) across all recommended pipe diameters. It combines power with intelligence and delivers a reliable, high-yielding production environment.

Explore the latest developments in DTH drilling rig technology, global market trends, and real-world mining applications. Discover how Shandong Unite Machinery delivers ...

The reason customer want to drill the hole is that drill and blast is the most efficient and economic way to break rock instead of excavating it. ...

Drilling Methods The components of a drill rig are (1) the rig itself, which supplies the power to mobilize, drill rock, and remove the drill cuttings from the hole; (2) the mounting; (3) the drill ...

YG integrated down the hole drill rig is highly efficient, energy-saving and powerful, suitable for a variety of complex working conditions.
