

## Is the recycling value of a pneumatic rock drill high

Can you recycle old power tools?

When you want to recycle power tools, your choices are either to donate them or find a local electronics waste recycling site where you can drop off old tools. Inspect old power tools thoroughly before donating them.

Should you recycle your old tools?

Recycling isn't just for paper and plastic. Many companies now offer tool recycling programs, turning your old tools into new products or ensuring they're disposed of in an eco-friendly manner. By participating, you're not only decluttering your space but also ensuring fewer tools end up in landfills.

Are old power tools bad for the environment?

When we casually discard our old power tools, we're not just getting rid of a piece of machinery. We're contributing to a growing environmental crisis. Improperly disposed of power tools can leak harmful chemicals into the soil, contaminating our water sources and harming wildlife. Electronic waste, or e-waste, is rapidly filling up our landfills.

What are the benefits of repurposing tools?

Plus, it's an eco-friendly option as many companies refurbish and resell traded-in tools. Reduce waste and conserve resources by giving tools new life. Create one-of-a-kind art and decor pieces from old tools. Experience the joy of repurposing and contributing to sustainability. Decrease energy usage by repurposing instead of creating new items.

Where can I recycle power tools?

If they no longer work, you may be able to recycle power tools the same way you would recycle electronic waste -- at a designated e-waste collection site run by your municipality's waste disposal agency. If you don't find any collection sites listed through Earth911, check your town or city's website for information about recycling sites.

Where can I recycle rechargeable power tool batteries?

First, you must remove any rechargeable power tool batteries from them. These batteries require special handling and recycling. Home improvement stores, electronics stores, and even grocery stores often accept rechargeable batteries for recycling. Find a drop-off location using the searchable map maintained by Call2Recycle.
