How many offshore drilling rigs does JAMSTEC operate?

We operate five offshore drilling rigs: three jack-up rigs, one semi-submersible rig, and one drillship. In addition to offshore drilling operations for oil and natural gas exploration and development, we also operate and manage "Chikyu", a deep earth exploration vessel owned by the Japan Agency for Marine-Earth Science and Technology (JAMSTEC).

What is a multi-environmental drilling rig?

We design and build multi-environmental drilling land rigs, for conventional and unconventional petroleum resources, which can operate in residential/urban areas, National Parks / Reserves, or any protected environment during animal migration seasons. The Drilling Control System (DCS) is at the heart of your drilling rig operations.

Are geotechnical drilling rigs a good idea?

The low impact and maneuverability of the geotechnical drilling rigs allow for free movement on geotechnical investigation sites with limited access, such as next to foundations, inside buildings, or under power lines. But don't be fooled by the small footprint.

What is a Geoprobe ® geotechnical drilling rig?

Complete your geotechnical investigation faster, easier, and safer when using a Geoprobe ® geotechnical drilling rig. The low impact and maneuverability of the geotechnical drilling rigs allow for free movement on geotechnical investigation sites with limited access, such as next to foundations, inside buildings, or under power lines.

What type of drilling rig is a Mitsubishi MD 501?
