

Jinhua screw air compressor operating specifications

What are the specifications for oil-injected rotary screw air compressors?

The document provides specifications for various models of oil-injected rotary screw air compressors, including: 1) Capacity and pressure ranges from 0.5-28.5 m³/min and 0.7-1.3 MPa depending on the model. 2) Motor power ranges from 5.5-220 kW. 3) Noise levels are generally between 65-75 dB (A).

What is a screw air compressor manual?

screw-air-compressor-manual (1) - Free download as PDF File (.pdf), Text File (.txt) or read online for free. The Screw Compressor Manual provides comprehensive guidelines on the operation, maintenance, and safety protocols for screw-type air compressors, emphasizing their efficient design and application in various industries.

What is a screw-type air compressor?

Screw-type air compressor structure of a unique design, a compact, stylish appearance, high efficiency, small energy consumption, low noise characteristics and long life, is a smart environment-friendly product. It is widely applied in metallurgy, machinery, chemicals, and mining, and electric power industries as the ideal gas source equipment.

What is the maximum noise level of a compressor?

Maximum noise level of compressor should be 70 dB(A) at normal load condition, one meter away from the machine. INTEGRATED REFRIGERATION TYPE AIR DRYER: Compressor Unit should have an integrated Air-cooled Refrigeration type Air Dryer with Moisture Trap (with automatic and manual drain), suitable for above mentioned applications.

What are the components of screw air compressor?

Screw air compressor is the main components of screw head, the separation of oil and gas cylinder. Screw suction filter through the nose and suction inlet control valve, oil also inject compressed room, a cooling of the nose, while the screw and the bearings lubricated by compressed air pressure that is generated.

What is a screw air compressor?

Air compressor is modular in design, screw rotor, oil and gas separation extinguishers, coolers, are installed in a motor, within the framework of acoustic enclosures through the noise of rubber materials. Screw air compressor is the main components of screw head, the separation of oil and gas cylinder.
