What is a user manual for the mam-880 screw air compressor controller?

This document provides a user manual for the MAM-880 screw air compressor controller. It describes the controller's features such as Chinese/English display, remote/local control, block/independent modes, motor on-off control, temperature measurement and protection functions.

What is a screw air compressor?

Air compressor is modular in design, screw rotor, oil and gas separation extinguishers, coolers, are installed in a motor, within the framework of acoustic enclosures through the noise of rubber materials. Screw air compressor is the main components of screw head, the separation of oil and gas cylinder.

Why should you read the air compressor operation manual?

No one realized fully automatic operation, intelligence operations, and remote control and linkage control. The operation manual is to help users get the best results, must be read carefully before operating. On the proper use and maintenance plan, will extend the service life and reduce air compressor failure.

What is a screw-type air compressor?

Screw-type air compressor structure of a unique design, a compact, stylish appearance, high efficiency, small energy consumption, low noise characteristics and long life, is a smart environment-friendly product. It is widely applied in metallurgy, machinery, chemicals, and mining, and electric power industries of the ideal gas source equipment.

How to install air compressor?

The ground is best to be smooth cement floor. The air compressor base should be placed at 0.5/1000 (mm). And there should be grooves around and on the platform, and then the oil and repairing or washing the ground. The size of the groove is decided by the user. 3. Make sure the bottom of the compressor is placed evenly on the platform, which can

How does a screw air compressor work?

Screw air compressor is divided into air cooling type and water cooling type, through the fan or water forcing cooling. Air cooling system consists of cooling fan, oil coolers and air cooler. The cooled air is pumped into the fan; go through oil cooler and air cooler, and at the same time, cool and compressing lubricating oil and air.
