

Maidebao engineering drilling rig anti-collision

The platform's capacity to simultaneously operate all rigs via a single software, equipped with anti-collision features and alerts, has effectively doubled our monitoring capabilities per individual.

ABSTRACT: Collision avoidance technology is one of the key technologies in the cluster well drilling process. In order to improve the measurement accuracy and reduce the ...

Abstract One of the most application of the directional drilling is drilling multiple wells from one location or platform. In drilling multiple wells from one location the major problem that faced is ...

The anti-collision system provides an adjustable window of protection around the monkey board but still allows for a full range of movement when picking up ...

Beijing BOMCO · Introduction Beijing BOMCO Offshore Petroleum Engineering Technology Co., Ltd. (BOMCOBJ), with previous name BOMCO-MH offshore petroleum ...

Based on the analysis of the anti-collision situation of infill wells in Bohai artificial island B, this paper studies the data verification technology, the overall optimization technology of well ...

The complex process of anti-collision in directional well planning has gained particular attention in the Alaska North Slope (ANS) as the economic and environmental ...

THE ANTI-COLLISION SYSTEM The system monitors moving equipment on a drilling rig including: traveling blocks, top drive, bails/elevator, and additional pipe handling systems. ...

Optimizing the trajectory of directional wellbores is essential to minimize drilling costs and the impacts of potential drilling problems. It poses ...

Beijing BOMCO · Introduction Beijing BOMCO Offshore Petroleum Engineering Technology Co., Ltd. (BOMCOBJ), with previous name BOMCO ...

Summary. The well-collision-avoidance management and principles presented in this paper are a culmination of the work and consensus of industry experts from both operators ...

The well-collision-avoidance separation rule presented in this paper is a culmination of the work and consensus of industry experts from both operators and service ...

Maidebao engineering drilling rig anti-collision

The Anti-Collision System is designed to be fully integrated with further equipment, such as complete pipe handling systems etc, via the Bentec Rig Zone Management System. The Anti ...

The existing drilling trend can be analyzed to determine whether corrective action is required, and if so, a revised trajectory can be calculated based upon "return to plan" or "project to target"; ...

- Our Top Drive Anti-collision System is a perfect solution to warn Oil Rig Drillers of possible collisions of the top drive with the derrick structure. - This system uses a wireless sensor that ...

Learn anti-collision, separation factor, ellipse of uncertainty, spider plot, travelling cylinder plot, directional drilling, well trajectory with Drillopedia.

Anti-collision monitoring (ACM) In this section, anti-collision monitoring (ACM) procedures as performed by COMPASS-SE are described. These are required to check the proximity of the ...

The Bentec ANTI COLLISION SYSTEM can be extended with the Rig Control System, which prevents collision with all other drilling equip- ment on the rig such as pipe handling systems, ...

OUR HIGHLY SOPHISTICATED DRILLING OPTIMIZATION SOFTWARE HELPS IMPROVE ACCURACY, QUALITY, AND EFFICIENCY DrillScan®; engineering software offers advanced ...

The aim of this paper is an analysis of collision avoidance as well as assessment and optimization of wellbore trajectory for minimizing the risk ...

What is Anti-collision Device in Rig?? An Anti-Collision Device (ACD) for the Travelling Block is a safety system used on drilling rigs to prevent collisions between the travelling block and other ...

The Anti Collision System protects the mast and drilling equipment in the center line from collisions and damage when operating the traveling equipment. The system ...

The aim of this paper is to provide a comprehension of the configuration of an ACS in an Integrated Drilling System and to develop a practical anti-collision algorithm that can be ...

The adoption of a particular minimum allowable separation rule, no matter how conservative, does not ensure acceptably low probability of collision. Many other factors contribute, including the ...

The Anti-Collision System is designed to be fully integrated with further equipment, such as complete pipe handling systems etc, via the Bentec Rig ...

Maidebao engineering drilling rig anti-collision

For each survey, the directional drilling supervisor and Well Operations Supervisor (or well ops engineer) shall verify that correct survey data has been received and wellbore positions ...
