What is a rock drill?

Rock Drill comprises a plaster figure perched on top of an actual rock drill. The combination of an industrial rock drill and the carved plaster figure makes the artwork an example of a 'Readymade' created at the same time as Marcel Duchamp's Bicycle Wheel (1913).

Why should you use a rock drill?

Your work is made relatively more manageable and simpler through the proper usage of Rock Drills or Drifters as they are sometimes known. The fact that they can be used remotely means that you will be safe while doing your mining work. You can keep a safe distance and let the drill do all the work.

How do rock drills work?

Rock Drills are usually mounted on feeds on equipment known as Jumbo Drills and then directed to where they are supposed to drill holes. The feeds are attached with booms that resemble arms and are flexible. The flexibility is meant to allow you to adjust the unit depending on where you want to drill.
