

Mountain Drilling Machine Disassembly and Assembly Video

How do you reassemble a portable drill?

After inspecting the interior components, reassemble the portable drill by placing all pieces in its original places and closing the exterior casing by refastening all removed screws. Switch on the drill to test it by placing a multimeter's two prongs to the portable drill's electrical wiring.

How do you fix a broken drill motor?

Remove the screws at the bottom of the drill's mechanical components and gently pull out the components from the drill's exterior casing. Check the trigger component under the drill motor as this part may malfunction with frequent use. Replace any damage you see to the trigger assembly.

How do you repair a hammer drill?

Open the drill to analyze its internal pieces and find out which pieces have to be repaired or replaced. Lay a towel on your work place, remove all the screws holding the drill together and place them on the towel. This ensures they don't roll away. Next open the casing to expose the drill's internal components.

Can I use a drill to disassemble a U-build Bionic knee?

Before disassembly we recommend that you use the drill as a tool to help on all parts of the U-Build Bionic Knee where it would be helpful, such as screwing in any fasteners or securing the prosthetic adapters onto the aluminum stock metal for the bypass.

How do you tighten a drill chuck?

Insert a large Hex key wrench into the chuck of the drill and tighten it. Find a sturdy surface, like a cement step, as well as something to soften the impact, like a piece of cardboard, so the wrench isn't damaged. Increase the torque to 20 and set the speed of the drill to level 2.

How do you remove a hammer drill?

Lay a towel on your work place, remove all the screws holding the drill together and place them on the towel. This ensures they don't roll away. Next open the casing to expose the drill's internal components. Remove the screws at the bottom of the drill's mechanical components and gently pull out the components from the drill's exterior casing.
