What is rotary screw air compressor oil?

Air compressor oil plays several vital roles within a rotary screw air compressor system: Rotary screw air compressors are sometimes "oil flooded" or "oil injected," describing that oil is injected into the rotor housing. The oil mixes with the air during compression but is separated back out before the compressed air leaves the system.

What is air compressor oil?

Air compressor oil is standard or synthetic oil made specifically for air compressors. Unlike motor oil, air compressor oil does not contain detergent and typically has lower amounts of carbon, sulfur, and other contaminants that can cause build-up.

What is the difference between motor oil and air compressor oil?

Unlike motor oil, air compressor oil does not contain detergent and typically has lower amounts of carbon, sulfur, and other contaminants that can cause build-up. Generally, rotary screw air compressors use synthetic oil, while recreational compressors may use standard oil.

Which air compressor oil should I use?

Manufacturers who don't specify an exact oil brand may still recommend a 20-weight or 30-weight non-detergent oil. 20-weight oil is typically used in colder environments, while 30-weight oil is better suited for warm climates. Some operators will switch between these oils for the summer and winter seasons. When should I change air compressor oil?
