

Original rock drill from Mali Egypt

Did ancient Egypt use a drill-shaft for rock coring?

using a boring tool. (after Hodges 1964). Notubular copper barrels or the wooden drill-shaft used for coring of rock have been found in the archaeological record from ancient Egypt, or from Mesopotamia and Crete where rock coring was also employed (Stocks 1993, Warren 1969).

Who invented the Rock Drill?

In 1851 Fowle patented a new design that was the seed of the modern rock drill. It was the first to use a flexible hose that made the drill independent from the boiler, and it later pioneered the use of compressed air for power transmission.

What is rock drilling?

Rock drilling is one of the world's most ancient technologies--and a pre requisite for nearly all the others THE PROGRESS OF MANKIND CAN BE MEASURED BY THE progress of mining and metallurgy.

How long does it take to drill a rock tunnel?

In average rock one man might drill 8 inches an hour, while a two-man crew might make 2 feet. It would take 20 to 30 holes, 1 to 1½ inches in diameter, to be able to blast away enough rock to advance a 4-by-6-foot tunnel 4 feet. Drilling those 120 feet of hole might use up 200 pieces of sharpened drill rod over several days.

When did rock drills start?

The first moderately successful rock drills appeared in the 1860s, their development spurred by the agonizingly slow progress that was being made on two major railroad tunnels: the 24,000-foot Hoosac Tunnel in Massachusetts and the 44,100-foot Mont Cenis Tunnel through the Alps between France and Italy.

Did the Old Kingdom drill a sarcophagus lid?

A functional analysis of the drilling of a granite sarcophagus lid from the Old Kingdom period has begun to suggest resolutions to an important scholarly controversy between Petrie and Lucas, and has produced some preliminary insights into the hitherto speculative technology used.
