What are rock drilling tools?

Rock drilling tools are essential in mining for various tasks, including exploration, production, tunneling, and ground support. They range from Top hammer drilling tools and DTH drilling tools for drilling, to self-drilling anchor tools for stabilizing structures.

What tools are used in quarrying?

Tools like DTH hammers and top hammer drills are used to drill blast holes for explosives, which break the rock into manageable pieces. These tools are crucial for efficiently separating stone from the quarry and shaping it for construction or other uses, ensuring both productivity and safety in the quarrying process.
