

Qinhuangdao diesel air compressor recycling

Should you sell or donate old air compressors?

Before recycling an air compressor, release all pressure from the tank to prevent dangerous, accidental releases. Often, selling or donating old air compressors depends on their level of functionality. There are some more things to know about each of those options than just the basics.

How do you dispose of an air compressor?

To dispose of an air compressor, first separate its components. Most accessories like the pressure switch, regulator, drain tank valve, and feet/stand can go in your regular trash. The metals, including the motor, can be sold for scrap.

Can you recycle an air compressor tank?

While the metals of an air compressor, including the motor, can be sold for scrap, the tank itself can be recycled. However, you will need to call ahead to a scrap metal recycler to ensure they can accept it. Alternatively, there are DIY projects that can be done with an air compressor tank if you have time and want to reuse it.
