

Rock drill chiseling frame accessories

What are rock chisels used for?

Rock chisels, also called gads, are essential tools for breaking open rocks and geodes. You can use flat chisels to split rocks neatly along a straight line and uncover hidden crystals inside geodes. Pointed chisels, on the other hand, focus all your hammer force in one spot, making it easy to crack larger rocks or expose natural cracks.

How do I choose a rock chisel?

When choosing a rock chisel, keep these key points in mind: Durability- The chisel blade should be made from strong, hardened steel or chrome-vanadium steel to withstand repeated hammer impacts. Carbide-tipped blades are ideal for extra-hard rocks. Safety - Look for chisels with thick handguards.

What chisels do RockHounds use?

You can use flat chisels to split rocks neatly along a straight line and uncover hidden crystals inside geodes. Pointed chisels, on the other hand, focus all your hammer force in one spot, making it easy to crack larger rocks or expose natural cracks. Some rockhounds prefer cheaper chisels because it's no big deal if they break or get lost.

What tools does a rockhound need?

If there's one tool every rockhound needs besides a , it's a quality rock chisel. Rock chisels, also called gads, are essential tools for breaking open rocks and geodes. You can use flat chisels to split rocks neatly along a straight line and uncover hidden crystals inside geodes.
