

## Rock drill gasoline factory direct sales price

What is a gasoline rock drilling machine?

The gasoline rock drilling machine is a portable rock drilling tool consisting of a small petrol engine, an air compressor, and a rock drill. During operation, rock powder is blown away by the compressed air produced by the machine itself. It can be used with a support frame.

What fuel should be used in a gas rock drill machine?

The fuel used in the gasoline rock drill machine is the No.70 and the No.15 gasoline engine lubricating oil, which should be matched strictly according to the ratio of the volume to 12:1. The fuel and fuel tanks should be kept clean. When the machine breaks down, check the oil circuit first.

What is a gasoline rock drill used for?

The gasoline rock drill has the functions of mining, drilling, building construction, cement pavement, asphalt pavement, and other cracking, crushing tamping shovel, and other functions. It is widely used in mining construction, fire fighting, geological exploration, road construction, quarrying, defense engineering, and so on.

Can a rock drill machine work in the open air?

Therefore, in general, it is only allowed to work in the open air. The fuel used in the gasoline rock drill machine is the No.70 and the No.15 gasoline engine lubricating oil, which should be matched strictly according to the ratio of the volume to 12:1. The fuel and fuel tanks should be kept clean.
