

Rock drill manufacturer introduction

What is a rock drill?

As you would imagine, a rock drill is a machine used to drill rock; that is, to make a hole in rock, and is mainly used to drill holes for charging gunpowder when blasting bedrock. Rock drills are broadly classified into three types based on the drilling principle: top hammer drills, down-the-hole (DTH) drills, and rotary drills.

Who invented rock drills?

First let us look at the first half of the early period. In 1813, British inventor Richard Trevithick invented a steam-driven auger drill which was used at a mine in his native Cornwall. This began the history of rock drills. Then in 1839, the American Singer brothers developed a rock drill in which the chisel could be lifted using steam power.

Who makes rock drills in Japan?

Its rock drill works started operation in the Ashio Copper Mine days, and Japan's first rock drill was developed at this works. Established in 1972. Specializing in the manufacture of hydraulic crushers, pneumatic crawler drills and other products. FRD KITA-KANTO CO., LTD.
