

Rock drill water stop valve installation video

Do you need a pipe cutter to install a stop valve?

Pipe cutters are the only tool required to install, and they even install in wet lines. SharkBite offers a full range of stop valves, including angle, straight, dual, and many more. So, ensure you have the proper stop valve for your application. Shut off the water supply to the area you are working on.

What is a 1/4 turn water stop valve?

1/4-Turn Water Stop Valves provide easy on/off operation for controlling the flow of water and are designed for connections where a water line passes through a wall. Whether replacing or installing new, it is crucial to properly install and maintain your Stop/Shut off Valves. Before you begin, make sure you choose the correct shut off valve.

How do you insert a stop valve?

Be sure to leave at least one inch of pipe to insert the stop valve. Measure and mark the insertion depth. With the SharkBite Deburr & Gauge Tool, mark the insertion depth. You can also find the SharkBite Insertion Depth Chart [here](#). Make the connection. Push the fitting to your mark.

How do you remove a stop valve?

Remove the valve and ensure existing nuts, ferrules and stiffeners are removed from the stub out pipe. Note: For iron pipe connections, remove the valve using two wrenches. For copper sweat and PEX connections, cut off the valve completely. 2. Prepare the Stub Out Before you install your stop valve, prepare the stub out.

How do you use a Sharkbite water shut off valve?

Emery cloth also is great for cleaning the first 1 inch. Place the SharkBite depth tool on copper pipe and make a mark 1 inch from the edge. Now all you have to do is slide the SharkBite water shut off valve onto the pipe. PRESTO!!! You're done. Well, almost done. The final step is to test your work by slowly turning the water back on.

How do you stub out a stop valve?

Ensure your stub-out is cut squarely and is free of debris. If using copper, deburr the pipe using Emory Cloth and a Deburring Tool. Be sure to leave at least one inch of pipe to insert the stop valve. Measure and mark the insertion depth. With the SharkBite Deburr & Gauge Tool, mark the insertion depth.

This rock fountain is an easy project that makes a big impact on your outdoor space. There is nothing like flowing water to bring your garden to life. With minimal tools, and about an hour's worth ...
