

Screw air compressor air pump replacement video

How does a screw compressor work?

A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand. The inlet valve is controlled by a solenoid valve that supplies control air to the inlet/loading valve. Check solenoid valve coil and solenoid valve operation.

How do you rebuild an air compressor pump?

Rebuilding the air compressor pump restores the pump's ability to efficiently compress air. If the tank won't build pressure because the pump seals or valve plate are worn, rebuild the pump using the manufacturer-approved air compressor parts. Most air compressor models use a kit for rebuilding the air compressor pump.

Do air compressors need a rebuild kit?

Most air compressor models use a kit for rebuilding the air compressor pump. The rebuild kit includes the cylinder sleeve, piston and seals. Follow the steps in this repair guide and video to install the air compressor pump rebuild kit on Craftsman, Porter Cable, DeWalt and Devilbiss air compressors.

How does an air compressor pump work?

The air compressor motor drives a piston that compresses air in the pump cylinder to fill the compressor tank. Worn pump parts-- such as the valve plate and seals--stop the pump from compressing the air and filling the tank. Rebuilding the air compressor pump restores the pump's ability to efficiently compress air.

How do you replace a reed valve on an air compressor?

Place the new valve plate on the pump body with the reed valves positioned on the handle side of the air compressor. Position the pump head over the new valve plate with the muffler side of the pump head over the reed valves on the valve plate. Reinstall the pump head mounting bolts. Tighten the pump head mounting bolts to 7 foot-pounds.

What happens if a compressor pump doesn't fill a tank?

Transcript: The compressor motor drives a piston that compresses air in the tank. Worn pump parts and seals prevent the pump from filling the tank with compressed air. If the pump won't compress air and fill the tank, rebuild the pump using the steps in this video. Before you begin, wear work gloves to protect your hands.
