How does a screw compressor work?

A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand. The inlet valve is controlled by a solenoid valve that supplies control air to the inlet/loading valve. Check solenoid valve coil and solenoid valve operation.

How oil injected screw air compressor works?

The oil-injected screw air compressor has the characteristics of reliable running performance, few wearing parts, low vibration, low noise, and high efficiency. During the compression process, the compressor continuously sprays lubricating oil into the compression chamber and bearings by virtue of its own pressure difference.

How to start a screw compressor?

Standard screw compressor is equipped with microprocessor control panel. When compressor is at stop status, press this button to start the compressor. the compressor and activate block mode function at the same time. -- Stop Button: When the compressor is at running status, press this button to stop the compressor.

What is a screw air compressor?

Air compressor is modular in design, screw rotor, oil and gas separation extinguishers, coolers, are installed in a motor, within the framework of acoustic enclosures through the noise of rubber materials. Screw air compressor is the main components of screw head, the separation of oil and gas cylinder.

What are the components of screw air compressor?

Screw air compressor is the main components of screw head, the separation of oil and gas cylinder. Screw suction filter through the nose and suction inlet control valve, oil also inject compressed room, a cooling of the nose, while the screw and the bearings lubricated by compressed air pressure that is generated.

How do you check a screw compressor?

Check the set data, voltage, bearings, tubes, and other mechanical system. Screw compressor requires the minimum amount of inspection and maintenance. The controller and indicator alert the operator to perform required maintenance or repair unit problems. Screw compressors are filled & tested with Total lubricant.
