

Screw air compressor tank weight

How much does a stationary compressor weigh?

Stationary Compressors: Built for heavy-duty industrial use, stationary compressors can weigh from 200 pounds to over 500 pounds. The size of the air tank has a direct correlation with weight. Larger tanks made of steel or cast iron are significantly heavier than smaller aluminum or composite tanks.

Which rotary screw air compressors are available at 175 psi?

Units are available at 175 PSI (QGSV 5-10 150PSI). Quincy Compressor proudly introduces the latest addition to our lineup: the QGD 75-125 range of rotary screw air compressors!

What factors affect the weight of an air compressor?

The motor and pump type also influence the weight of an air compressor: Electric Motors: Tend to be lighter compared to gas-powered motors. Oil-Free Pumps: These are generally lighter but may not last as long as oil-lubricated pumps, which are heavier due to their construction and components.
