What is a down the hole drilling rig?

Down the hole drilling rig is an impact rotary drilling rig. Its internal structure is different from that of a general rock drill.

What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.

How long did it take to drill a 12,000 ft hole?

The original estimate for completion of a 12,000-foot hole was 30 days using the conventional rotary technique, which was reduced to 13 days using the DTH method. Before DTH was used, drillers would typically case the vertical portion of the well and convert to rotary drilling to drill at a tangent.

How does a DTH drill work?

DTH equipment consists of a drilling hammer and a piston-powered by compressed air. As the drill string rotates, the drilling hammer strikes down on the rock. The drill bit receives its striking power from a piston inside the hammer that is powered by compressed air.

The Tunneling Company is an industry leader in Horizontal DTH (Down the Hole) drilling -- allowing our partners to complete trenchless crossings previously thought to be impossible.

Leopard(TM) DI550 diesel-powered, down-the-hole (DTH) drill has enhanced mobility, a smaller footprint and can serve multiple sites. Designed for DTH ...

The Small DTH (Down The Hole) Drilling Rig is a compact, mobile drilling machine designed for drilling deep and precise holes in a variety of geological conditions. These rigs are particularly ...

The down the hole drilling rig is an efficient rock drilling equipment, with the core feature of synchronous drilling of the down the hole impactor and drill bit. It has low energy consumption and ...

tunnel tunneling and bolt hole reinforcement projects. Their well-designed shape, ...

The reason customer want to drill the hole is that drill and blast is the most efficient and economic way to break rock instead of excavating it. ...

Check out this small tunnel drilling machine in action! In this video, we show you how this powerful tool works in confined spaces, helping improve efficiency and speed on construction sites.

KOONSA drilling rigs are widely used for rock drilling in open-pit mining, building foundation excavation, water conservancy, power station, traffic and national defence construction, etc. ...

The Tunneling Company's down the hole (DTH) boring system is the world's first purpose-built horizontal DTH drilling solution. This robust and cost effective system can tackle challenging soil ...
