What is a core drill rig?

A core drill rig is a specialized piece of equipment for core sampling. They allow professional drillers to extract a piece of the ground by drilling cylindrical holes in the surface, simplifying the drilling process and eliminating the need for purchasing specialty equipment.

What is a direct push drilling rig?

Direct push drilling rigs are machines that use a hydraulic hammer drill to penetrate the ground. These are useful for collecting soil and groundwater samples without the need for rotary drilling. We offer a range of models for varying depths and needs from Geoprobe rigs.

What are the different types of drilling equipment?

There are various types of drilling equipment, including coring, exploration, direct push, geotechnical, and environmental. This equipment is tough, durable, and brings incredible performance in every endeavor. Rig Source, with our commitment to excellence, stands as a leader in offering some of the best drilling equipment available for rent.
