How does Virtek's IRIS truss work?

Initial alignment is 20X faster and re-alignments are reduced from minutes to seconds - save time, increase workflow all while retaining quality and accuracy. The Virtek's IRIS Truss system projects a laser template of the truss to be built onto the work surface, highlighting the position and shape of all truss joints and connector plates.

Improve your quality control with Virtek LaserQC. The non-contact inspection solution for increased accuracy and reduced scrap. Learn more on this page.
