

# Warm rock drill

What is a rock drill?

Let's briefly lay down some groundwork: Rock drills are machines or tools specifically designed to penetrate hard surfaces like stone, concrete, or mineral deposits. These drills come in various forms and sizes, each tailored for unique drilling requirements, be it for construction, mining, or archaeological excavations.

How do I choose the best apt Rock Drill?

Learn how to select the ideal APT rock drill for your specific tasks, covering key factors to consider for efficiency and optimal performance on the job. Drill through rock with ease. Our 9-60 lb Rock Drills hit 2,100-3,400 BPM, great for anchor holes, blasting prep, or tough surfaces. Use wet or dry with the APT valve for total jobsite control.

Do I need a hammer when drilling rock?

Also ensure you're using the hammer function on your drill. Do I really need to use water when drilling rock? Yes. Water cooling is crucial as it prevents the bit from overheating (which causes it to dull quickly), reduces dust, and helps flush away particles that would otherwise impede drilling progress.

What are the different types of rock drilling?

Types of Drills: The landscape of rock drilling is vast, with rotary, percussion, diamond, and masonry drills catering to different needs. Choosing the right type can greatly affect not just efficiency but also the quality of the drilling performed.

How powerful is a PT M109 Rock Drill?

With 2,100 to 3,400 BPM and an attachable APT valve, our tools can be used in wet or dry environments and are powerful enough for all your drilling needs! Lightweight and easy to handle, the APT M109 rock drill is perfect for drilling anchor bolt holes and small dowel holes.

Do you need personal protective equipment for rock drilling?

Every drill operator knows that the best way to avoid injury is to be equipped with the proper gear. The right protective equipment acts as the first line of defense against hazards that are part of the rock drilling landscape. Wearing personal protective equipment (PPE) isn't simply recommended; it's essential. The critical items include:

Warm up the engine for 5 minutes (More than 10 minutes in winter) When the warming-up ends, conduct hydraulic oil heating, compressor operation, traveling or drilling operation.
