What types of drilling rigs are available?

The drilling videos featured here on our website showcase the capabilities of various types of drilling rigs, including water well drilling, auger drilling, core drilling, and more.

What is the minimum anchor holding capacity for a 3000 well?

The minimum recommended anchor holding capacity (with a safety factor of 2) for a 3000 well has been determined to be 12000 pounds with a well to anchor distance of 113 feet to 127 feet. A more realistic well to anchor distance of 65 feet to 100 feet will require an anchor holding capacity of 19,000 pounds

How do I install a certified anchor?

1. Installation of tested- certified anchors set at either an API pattern or a pattern that is determined to handle the stresses put on the anchors in the case an API pattern cannot be achieved. ( OSAS has a Program to Calculate Non API Anchor Patterns ) 2. Rig Footing- Rig footing is just as important as tying off to certified anchors. 3.

How do you stabilize a rig?

3. Proper tensioning of the guy lines. To properly stabilize your rig all three steps must be met. Any one of these steps not followed can result in an unstable rig up. These anchors are generally a single helix screw type anchor that is installed by the rig crew using a bar and a cheater bar.

How deep should anchors be installed?

In most cases, the anchors are installed no deeper than 3 feet below surface, due to the difficulty installing these anchors. Holding capacity of these anchors is less than 2000 pounds in some cases the anchors start failing while the crew is adding tension to the rig guy lines. Crews are using a hand auger to pre-drill the anchor holes.

Why is anchor holing a problem?

By disturbing the natural compaction of the soil, the anchor holding capacity is severely jeopardized. In 1990, a study involving anchor pull tests were performed on approximately 400 hand installed anchors in Texas, Louisiana, and California. It was determined that approximately 80% of all anchors failed at loads under 5000 pounds.
