A variety of geothermal drilling videos allow you to view Air Rotary DTH Hammer and Mud Rotary drilling.

How do you drill a hole in a well?

Before the drill point is used, a pilot hole about two feet deep needs to be dug into the ground with a post-hole digger. A threaded cap is screwed onto the end of the well point, without tightening it, to protect the threads on the end of the pipe. The drill point can be placed in this hole and driven into the ground with a sledge hammer.

The well is tested for water quality and yield. Once satisfactory, a well cap is installed, and the surrounding area is graded for proper drainage. ...
